

I recently heard that K-Love signal may be replaced by an LPFM. I just found this station within the past year and find it so refreshing and uplifting compared to all the other stations on the air. Some days I struggle to get it to come in because it is already on a low frequency station. Please don't delete it altogether from the air waves. With all the negativity horrendous things happening in our world today, we need the presence of a morally uplifting radio station to impact our lives. My grandchildren like to listen to this station and with all the crime and violence in the world today, this sends them a positive message rather than the sex and violence depicted in so much of today's music. Don't you think the children of today and tomorrow need that positive influence?
